University in St. Louis  
SCHOOL OF MEDICINE

### **FEATURING:**

- Didactic lectures supplemented with video clips, live surgical cases and case discussions
- Renowned Mayo Clinic and Washington University Faculty
- Optional Hands-On Workshop in Mayo Clinic's Center for Procedural Innovation

## *An Invitation from the Course Directors*

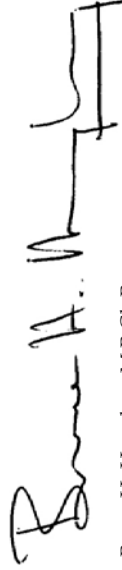

Please join us February 27 – March 1, 2014 in Phoenix, Arizona for “Transoral Surgery for Head and Neck Cancer,” a continuing medical education activity designed to give Otolaryngologists, Head and Neck Surgeons, Oral Maxillofacial Surgeons, and Head and Neck Oncologists a focused educational experience in transoral endoscopic techniques for resecting primary head and neck tumors. Both transoral laser and robotic surgery will be featured, as well as flexible laser surgery in inpatient and outpatient environments.

An optional cadaveric hands-on workshop will provide participants with opportunities to perform various transoral procedures with laser technologies and delivery systems. Renowned faculty will emphasize fundamental transoral anatomy, microsurgical and robotic techniques, and wound exposure, as well as other transoral techniques. Workshop participants will gain experience in the art of tumor exposure using various retractors and appropriate and safe use of multiple transoral systems.

A complete brochure including course and workshop objectives, program schedule, faculty list, accommodations and registration information will be posted in September 2013 on our website, [www.mayo.edu/cme](http://www.mayo.edu/cme).

This program will be held in Mayo Clinic’s state-of-the-art education center in Phoenix, Arizona. We hope you will join us for this exciting program that can ultimately result in better outcomes and quality of life for many of your patients.

Sincerely,

Bruce H. Haughey, M.B.Ch.B.  
Kimbrough Professor of Otolaryngology  
Washington University School of Medicine  
Director, Head and Neck Surgical Oncology
